Relevant Experience

Fullstack Developer · **Osstell**   April 2025 — present

- Built and shipped web and mobile features in React, TypeScript, and React Native, while maintaining a shared component library and design system used across products.
- Developed and integrated secure REST APIs and authentication flows to improve reliability and user experience.
- Spearhead company wide accessibility initiatives such as creating documentation for best practices, establishing a standard accessibility checklist for developers, and facilitating knowledge shares

Fullstack Developer · **Ebbot**   May 2024 – April 2025

- Led development and optimization of the company's core platform with TypeScript, React, and Node.js in a fast-paced environment.
- Translated user research and feedback into thoughtful UX improvements across key product areas.
- Drove modernization initiatives and collaborated closely with product managers and designers to shape new features.

Frontend Developer · **HiQ**   June 2022 — May 2024

- Built and launched enterprise-grade React/TypeScript applications for clients including Ericsson and Renault Trucks.
- Implemented accessibility features and patterns to ensure compliance with WCAG 2.1 standards.
- Worked in agile, cross-functional teams, collaborating with designers, backend developers, and QA to deliver robust solutions.

FrontEnd Developer · **Decerno**   January 2022 – June 2022
Web Editor and Quality Assurance Specialist   June 2021 – August 2021

- Developed key responsive features for client applications, focusing on usability and stability.
- Worked with and improved established QA processes that improved testing coverage and reduced platform issues.
- Designed and implemented advanced React components while gaining consulting experience in enterprise environments.

UX Designer · **TietoEVRY**   June 2019 – April 2020

- Led user testing initiatives and transformed findings into actionable interface updates and redesigns.
- Collaborated with developers to operationalize UX concepts and ensure consistency across multi-platform interfaces.
- Developed and sustained design systems, facilitated workshops, and assisted stakeholders in embracing user-centered methodologies.
